

Hydrastone Residential Electric Water Heaters

Vaughn delivers the ultimate in energy savings. Our new plastic jacket water heaters combine Hydrastone, the most effective method of preventing corrosion, with foam, the most efficient material for preventing heat loss.

OLD FASHIONED QUALITY

We make water heaters like we used to, only better. For three generations Vaughn has built their water heaters of heavy gauge steel with seamless 1/2 thick Hydrastone lining and bronze fittings at all water openings.

ADVANCED TECHNOLOGY

You'll pay less to keep your water hot with our highly efficient urethane foam insulation. It completely surrounds the long-lasting tank, reducing heat loss by as much as 68%. By superior engineering, Vaughn's tank surpasses other conventional fiberglass insulated water heaters.

This unequalled combination of quality and technology – **Hydrastone plus foam** – is available in all our residential heaters.

FEATURES

Bronze Fittings

At all water openings eliminates corrosion due to dissimilar metals. No dielectric unions or anode rod required.

Brass Cold Water Inlet and Drain with Diffuser

Introduces cold water at the bottom of the tank and prevents turbulent mixing with heated water: this insures desired layering of hot water throughout the tank.

Hand Hole Cleanout Option

Large opening provides easy access to remove severe mineral build-up.

Hydrastone Lining

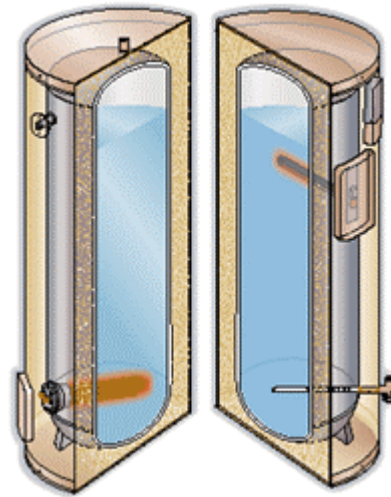

A seamless one-half inch thick stone lining impervious to any adverse water conditions, proven to be the most effective method of preventing tank failure due to corrosion.

New Plastic Jacket

Rust-free, light weight, all plastic outer jacket. Easy to clean and no maintenance.

Heat Trap

Specially designed built-in hot water outlet pipe preventing unnecessary heat loss.

Ultimate Insulation

Two to three inches of polyurethane foam combined with heat-retaining stone lining allows less than one-third degree per hour heat loss. There is simply none better.

Long-Life Elements

Special low watt density, copper flanged heating elements for reduced mineral build-up.

10 Year Limited Warranty!

For decades the quality standard by which others are judged.
